Press Note.

Revised Petition Rules.

Government wish to notify for the information of the public that, according to the revised petition Rules approved in Government Order No. M. 7136-236—G.M. 31-50-5, dated 25th July 1950 and published in the "*Mysore Gazette*" dated 3rd August 1950, no endorsement or reply will be sent to communications addressed to Government, unless postal stamps of value of two annas are enclosed. Where a reply could be sent on a post card, it is enough if the parties concerned enclose postage of the value of nine pies. These rules are applicable to communications addressed to the Hon'ble the Ministers, all Government Offices and to local bodies also. The public are requested to enclose the necessary postal stamps to all communications addressed to the Hon'ble the Ministers, Government Offices, and to local bodies, if they want an endorsement or reply. No endorsement or reply will be issued when the necessary postage is not enclosed.

Press Note.

Health of Live-stock in Mysore during April 1952.

In their order of severity, outbreaks of Rinderpest, Blackquarter, Anthrax, Foot and Mouth, Sheep-pox, Hæmorrhagic-septicæmia, Contagious Goat Pleuropneumonia, Ranikhet and Gastro-entritis were encountered in the State during April 1952. Altogether 233 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 214 villages during the previous month. The number of outbreaks was highest in Shimoga, Bangalore and Chitaldrug districts, while Hassan, Mandya and Chikmagalur districts were least affected. These diseases accounted for 1,798 attacks, of which 847 succumbed. The departmental staff conducted 66,309 preventive innoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Twelve outbreaks of Rinderpest were registered in Bangalore North, Devanahalli, Goribidanur, Channagiri, Challakere and Sira taluks accounting for 250 attacks among cattle, of which 133 succumbed. Prompt measures of control were undertaken by the department to check its spread and 17,369 cattle in the infected villages and 22,359 cattle in 77 neighbouring villages were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 113 villages accounting for 5 deaths, as against 117 villages accounting for 20 deaths during the previous month. The special staff attached to the parasitic disease control units of the department dosed 8,422 animals during the previous month.

Fodder and water were generally available throughout the State.
